

## RESIDENT LEVELS OF CARE AND SUPERVISORY LINES OF RESPONSIBILITY

Department Name: Obstetrics & Gynecology

Resident Level: 1

Clinical Diagnosis Management	Clinical Diagnosis Management	Clinical Invasive (Operative Management)
<p>Perform and document history &amp; physical exam including pelvic exam; Perform differential diagnosis; Develop and document preoperative and postoperative care treatment plan; Perform and document preoperative exam; Perform and document postoperative care; Develop and document fluid and electrolyte therapy; Order appropriate consults; Obtain and document informed consent; Dictate operative note; Dictate discharge summary; Order &amp; interpret diagnostic laboratory tests; Order &amp; interpret imaging studies; Perform rectal exam and hemocult tests; Perform Pap smear; Perform and document wet prep and ferning; Order and interpret EKG; Perform cervical cultures; Perform wound cultures; Perform and interpret urinalysis; Perform pelvic and vaginal ultrasound in both obstetrical and non-obstetrical patients*; Perform saline ultrasound*; Perform Q-tip test; Perform and interpret antepartum fetal heart rate testing*; Perform and interpret hysterosalpingogram*</p>	<p>Order fluid and electrolyte therapy; Order transfusions of blood and blood products; Order pain management therapy; Order medications; Management of common medical emergencies; Medical management of ectopic pregnancy*; Contraceptive management ; Management of Obstetrical patients* with cardiac disease, chronic hypertensive disease, connective tissue disease, diabetes mellitus, fetal growth retardation, gestational trophoblastic disease, thyroid disease, renal disease, isoimmunization, pregnancy induced hypertension, pre-eclampsia, eclampsia, preterm labor, preterm rupture of membranes, premature rupture of membranes, complications of abortion</p> <p>Management of gynecologic patients* with abnormal uterine bleeding, abnormal Pap smears, post-menopausal bleeding, urinary tract infection, menopausal symptoms, pelvic infection, acute salpingitis, endometritis, endometriosis, gynecologic cancer</p> <p>Post-operative care*</p> <p>Management of labor and delivery including fetal heart rate interpretation*</p> <p>Pessary insertion</p> <p>Diaphragm fitting</p> <p>IUD insertion</p> <p>Norplant removal</p> <p>Induction and augmentation of labor*</p>	<p>Perform endometrial biopsy, colposcopy and cervical, vaginal and vulvar biopsies trucut biopsies of soft tissue masses*, paracentesis*, endotracheal intubation, cardiopulmonary resuscitation; start intravenous lines, venipuncture, &amp; blood cultures Perform, order, and interpret arterial blood gases, bladder cauterization, urodynamic testing including cystometrogram, urethral pressure profile, leak point pressures*, central line insertion*, arterial line insertion*, cystoscopy/urethroscopy*, proctoscopy, anoscopy*, diagnostic laparoscopy*, laparoscopic tubal sterilization*, post-partum sterilization*, spontaneous vaginal delivery , Perform manual removal of placenta*, outlet/low forceps delivery*, management of labor and delivery including fetal heart rate interpretation*, vacuum assisted delivery*, dilatation &amp; curettage*, suction curettage*, diagnostic hysteroscopy*, incision and drainage of abscess including Bartholin's duct abscess, marsupialization of Bartholin's cyst*, cold knife conization of cervix*, LEEP excision of cervix/LEEP cone*, laser vaporization of cervix/laser cone*, cervical cryotherapy, excisional biopsy of cervix, vaginal, vulva, simple episiotomy repair, repair of 3rd &amp; 4th degree lacerations*, Repair of simple vaginal, cervical, labial lacerations, repair of complex vaginal, cervical, and labial lacerations* , Perform wound care, primary wound closure, wound debridement and irrigation, excision skin lesions, Repair simple lacerations, as first assistant in obstetrical and gynecologic surgery, , culdocentesis, abdominal incisions*, trigger point injections*</p>

**\* Requires Supervision by a Teaching (Faculty) Physician or Upper Level Resident determined by the individual Resident level of performance.**

**RESIDENT LEVELS OF CARE AND SUPERVISORY LINES OF RESPONSIBILITY**

Department Name: Obstetrics & Gynecology

Resident Level: 2

Clinical Diagnosis Management	Clinical Diagnosis Management	Clinical Invasive (Operative Management)
<p>Perform pelvic and vaginal ultrasound in both obstetrical and non-obstetrical patients*</p> <p>Perform saline ultrasound*</p> <p>Perform and interpret antepartum fetal heart rate testing*</p> <p>All other items listed for PG 1 without *</p>	<p>Medical management of ectopic pregnancy</p> <p>Post-operative care</p> <p>Management of Obstetrical patients with: Cardiac disease*, Chronic hypertensive disease*, Connective tissue disease*, Diabetes mellitus*, Fetal growth retardation*, Gestational trophoblastic disease*, Thyroid disease*, Renal disease*, Isoimmunization*, Pregnancy induced hypertension*, Preeclampsia*, Eclampsia*, Preterm labor*, Preterm rupture of membranes*, Premature rupture of membranes*, Complications of abortion*</p> <p>Management of gynecologic patients with abnormal uterine bleeding, abnormal Pap smears, post-menopausal bleeding, urinary tract infection, menopausal symptoms, pelvic infection, acute salpingitis, endometritis, endometriosis, gynecologic cancer</p> <p>Management of labor and delivery including fetal heart rate interpretation</p> <p>Induction and augmentation of labor</p> <p>Ventilator management*</p> <p>All other items listed for PG 1 without *</p>	<p>Perform trucut biopsy of soft tissue masses; Paracentesis*; Urodynamic testing; Cystometrogram; Urethral pressure profile; Leak point pressures; Central line insertion; Arterial line insertion; Cystoscopy/urethroscopy*; Proctoscopy* ; Anoscopy*; Diagnostic laparoscopy*; Laparoscopic tubal sterilization; Post-partum sterilization; Spontaneous vaginal delivery, vacuum assisted delivery*; Outlet/low forceps delivery*; dilatation &amp; curettage; Suction curettage; Diagnostic hysteroscopy*; Marsupialization of Bartholin's cyst* ; Cold knife conization of cervix; LEEP excision of cervix/LEEP cone; Laser vaporization of cervix/laser cone; Laser vaporization of vulvar lesions*; Repair of complex vaginal, cervical, and labial lacerations*; Perform cesarean section*; Cervical cerclage*; Manual removal of placenta ; Abdominal hysterectomy*; Vaginal hysterectomy*; Retropubic urethropexy*; Colporrhaphy/perineorrhaphy*; Laparoscopic assisted vaginal hysterectomy*; Salpingectomy/salpingostomy - open &amp; laparoscopic*; Oophorectomy, ovarian cystectomy - open &amp; laparoscopic*; Incidental appendectomy-open*; Amnio reduction*; Genetic amniocentesis*; Amniocentesis for lung maturity*; External cephalic version*; Incision of vaginal septum*; Abdominal incisions*; Trigger point injections; Cystotomy and repair*; Insertion of suprapubic catheter under cystoscopic guidance*; alleged sexual assault examinations</p> <p>All other items listed for PG 1 without *</p>

\* Requires Supervision by a Teaching (Faculty) Physician or Upper Level Resident determined by the individual Resident level of performance.

## RESIDENT LEVELS OF CARE AND SUPERVISORY LINES OF RESPONSIBILITY

Department Name: Obstetrics & Gynecology

Resident Level: 3

Clinical Diagnosis Management	Clinical Diagnosis Management	Clinical Invasive (Operative Management)
<p>Perform pelvic and vaginal ultrasound in both obstetrical and non-obstetrical patients</p> <p>Perform saline ultrasound</p> <p>Perform and interpret antepartum fetal heart rate testing</p> <p>All other items listed for PG 2 without *</p>	<p>Ventilator management</p> <p>All other items listed for PG 2 without *</p>	<p>Perform laser vaporization of vulvar lesions; Repair of complex vaginal, cervical, and labial lacerations; cervical cerclage; cesarean section*; abdominal hysterectomy*; vaginal hysterectomy*; retropubic urethropexy*; colporraphy/perineorrhphy*; Laparoscopic assisted vaginal hysterectomy*;</p> <p>Salpingectomy/salpingostomy -open &amp; laparoscopic*; Oophorectomy ; Ovarian cystectomy - open &amp; laparoscopic*; Incidental appendectomy-open; Amnio reduction*; Genetic amniocentesis*; Amniocentesis for lung maturity; External cephalic version*; Mid-forceps delivery*; Vaginal breech delivery with or without forceps*; Cesarean hysterectomy*; Vaginal suspension - vaginal and abdominal approach*; Culdoplasty - abdominal and vaginal approach*; Colpotomy*;</p> <p>Myomectomy - open and laparoscopic*; Enterocoele resection - vaginal and abdominal*; Laparoscopic surgery for excision/destruction of endometriosis including harmonic scapel/electrocautery*; Repair of simple bladder/bowel injuries*; Uretrolysis*, pelvic, Para-aortic, and inguinal lymph node biopsies*; Hypogastric artery ligation*; Total and partial colpocleisis*; Repair of wound disruption/dehiscence/ evisceration*; Secondary wound closure*; Rectovaginal fistula repair*; Vesicovaginal fistula repair*; Simple vulvectomy*; Hysteroscopic surgery including endometrial ablation, metroplasty, resection of polyps, myomas*; abdominal incisions, cystotomy and repair; Insertion of suprapubic catheter under cystoscopic guidance</p> <p>All other items listed for PG 2 without *</p>

**\* Requires Supervision by a Teaching (Faculty) Physician or Upper Level Resident determined by the individual Resident level of performance.**

## RESIDENT LEVELS OF CARE AND SUPERVISORY LINES OF RESPONSIBILITY

Department Name: Obstetrics & Gynecology

Resident Level: 4

Clinical Diagnosis Management	Clinical Diagnosis Management	Clinical Invasive (Operative Management)
All items listed for PG 3 without *	All items listed for PG 3 without *	<p>Perform cesarean section*; abdominal hysterectomy*; vaginal hysterectomy*; retropubic urethropexy*; colporrhaphy/perineorrhphy*; laparoscopic assisted vaginal hysterectomy*; salpingectomy/salpingostomy - open &amp; laparoscopic*; oophorectomy; ovarian cystectomy -open &amp; laparoscopic*; incidental appendectomy-open; amnio reduction; genetic amniocentesis*; amniocentesis for lung maturity; external cephalic version*; mid-forceps delivery*; vaginal breech delivery with or without forceps*; cesarean hysterectomy*; vaginal suspension - vaginal and abdominal approach*; culdoplasty - abdominal and vaginal approach; colpotomy; myomectomy - open and laparoscopic*; enterocele resection-vaginal and abdominal*; laparoscopic surgery for excision/destruction of endometriosis including harmonic scapel/electrocautery*; repair of simple bladder/bowel injuries*; uretrolysis*- pelvic, Para-aortic, and inguinal lymph node biopsies*; hypogastric artery ligation*; total and partial colpocleisis*; repair of wound disruption/dehiscence/evisceration*; laparoscopic appendectomy*; secondary wound closure; rectovaginal fistula repair*; vesicovaginal fistula repair*; simple vulvectomy*; hysteroscopic surgery including endometrial ablation; metroplasty, resection of polyps, myomas*; incision of vaginal septum</p> <p>All other items listed for PG 3 without *</p>

**\* Requires Supervision by a Teaching (Faculty) Physician or Upper Level Resident determined by the individual Resident level of performance.**
