

Resident Level: PGY-1

Core Competencies

1. Medical knowledge
2. Patient care
3. Interpersonal and communication skills

4. Practice-based learning
5. Professionalism
6. Systems-based practice

Clinical Diagnosis and Management (Competencies)		Invasive Clinical Management (Competencies 1, 2, 3, 4, 5 for all procedures)
<p>Perform and document history and physical exam (1, 2, 3, 4, 5)</p> <p>Develop differential diagnosis and problem list (1, 2, 4)</p> <p>Develop and implement a diagnostic and treatment plan* (1, 2, 4)</p> <p>Order and interpret routine diagnostic studies (1, 2, 4)</p> <p>Order and interpret electrocardiogram * (1, 4)</p> <p>Modify daily plan of care* (1, 2, 4)</p> <p>Write daily progress notes (1, 2, 4)</p> <p>Write orders for routine diagnostic studies, medications, and other care modalities* (1, 2, 4)</p>	<p>Notes/Key: ++ For these procedures, the resident must perform a certain number <u>satisfactorily</u> under direct supervision of an upper level resident or faculty member. See Introduction for details.</p> <p>* Skill may require supervision of an upper level resident or faculty.</p> <p>** Procedure always requires presence of upper level resident or faculty.</p> <p>*** Procedure always requires presence of fellow or faculty</p> <p>If difficulty is encountered with <u>any</u> procedure, the resident <u>or</u> <u>the nurse</u> must call an upper level resident or faculty member for assistance.</p>	<p>Endotracheal intubation *</p> <p>Umbilical artery and vein catheter placement **</p> <p>Lumbar puncture *</p> <p>Suprapubic bladder aspiration *</p> <p>Placement of intravenous line*</p> <p>Central venous catheter placement*</p> <p>Perform arterial puncture *</p> <p>Suturing of laceration *</p> <p>Perform PALS *</p> <p>Perform NRP *</p> <p>Perform nasogastric intubation *</p> <p>Perform thoracentesis *</p>

--	--	--

<p>Evaluate patients with acute medical problems upon request of nurses or other physicians* (1, 2, 3, 4, 5)</p> <p>Obtain informed consent for procedures in PGY-1 scope of practice (1, 2, 3, 5)</p> <p>Order appropriate consults for diagnostic studies, evaluation by other physicians, physical/rehabilitation therapy, specialized nursing care, and social services (1, 2, 3, 4, 5, 6)</p> <p>Initiate discharge planning (1, 2, 3, 4, 5, 6)</p> <p>Dictate discharge summary (1, 2, 3, 4, 6)</p> <p>Evaluate new and follow-up patients in outpatient setting (1, 2, 3, 4, 5, 6)</p> <p>Have general knowledge of immunizations. (1, 2, 4)</p> <p>Have general knowledge of conscious sedation. (1, 2, 4)</p>		<p>Conscious Sedation ++</p> <p>Chest tube placement **</p> <p>Ventilator management *</p> <p>Perform pelvic exam *</p> <p>Incision and drainage of superficial abcess *</p> <p>Intramuscular injection *</p> <p>Subcutaneous injection *</p> <p>Foreign body removal *</p> <p>Insert urethral catheter*</p>
