

## **Invasive Procedure Complications**

### **PURPOSE:**

To insure that all complications of invasive procedures is properly reported in a timely manner for review and to insure that the patient is treated and adequately followed for outcome.

### **POLICY:**

All patients having invasive ultrasound procedures are logged in at the time of the procedure in a designated interventional logbook. This includes procedures within the department and those done portable in special units. If there are any complications post procedure they are recorded in the logbook and followed up by the attending radiologist. At the end of each month lists of any complications is sent to Performance Improvement for review and follow up.
