

SEARCH & RESCUE TEAM  
**SEARCH AND RESCUE PROCEDURES**

- A. Put on protective equipment prior to starting search and rescue.
- B. If possible, search under any fallen debris.
- C. Search the area visually.
- D. Listen for cries of help.
- E. Before entering any area, make sure that falling debris won't trap you. If you smell any odor of gas or see burning electrical circuits, leave the area immediately. Notify the Damage Assessment and Control Officer. Do not return until the gas has been shut off.
- F. Before entering any room, feel the door to make sure it is not hot. There could be a fire on the other side.
- G. If you locate an injured person, get medical help before moving the victim.
- H. After completing search of all assigned areas, report back to the Damage Assessment and Control Officer.
